The collection of South African species in the garden representing South African plants (Fynbos) at Wittunga botanic gardens in South Australia

Erica sessiliflora

Protea repens

Mount Lofty Botanic Garden

Wollemia nobilis

Wollemia nobilis, Wollemi Pine also known as a living fossil, was discovered in 1994 by David Noble in the gorges of Sydney and was named after him, it was then propagated and spread throughout the world, including Sydney Royal Botanic Garden and South Australia in Adelaide Botanic Garden and Mount Lofty Botanic Garden.

Nursery visits

Tolly's nursery

Plummars nursery

Straight lines

Work made easy

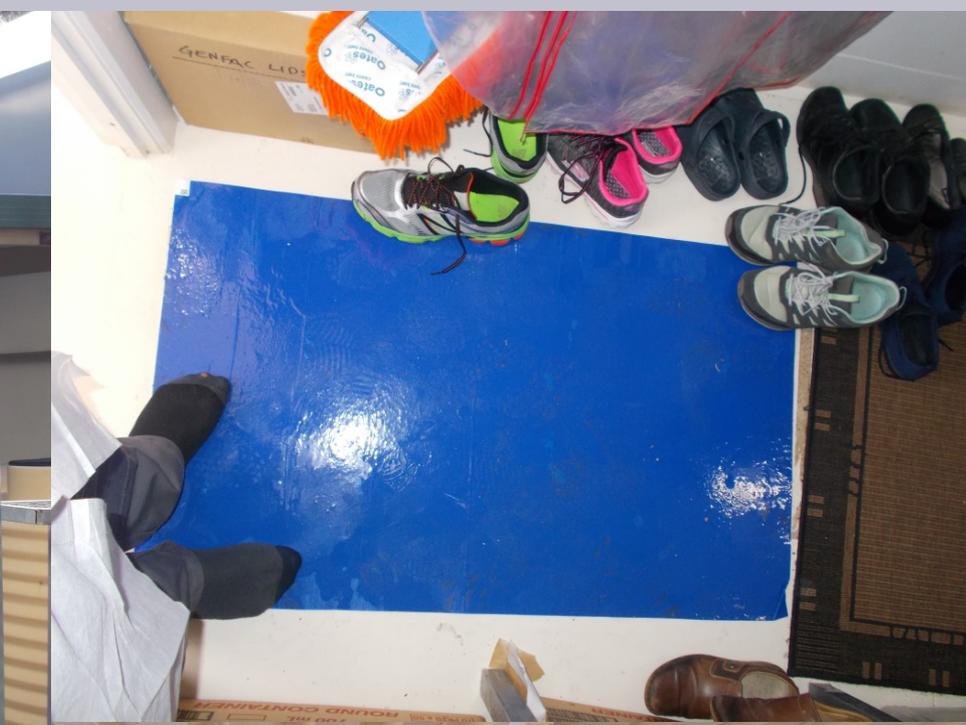

The cleanliness and neatness of the nursery brings out the quality of the plants produced, following the standards set by the NIASA
